

Pin Switch Section

This document is also available as PDF, you can find it in your section **zip file**, the file is called **pinswitch-documentation.pdf** or you can download it directly from the following link: [Pin Switch Documentation](#).

This assumes that you have already purchased and installed [PageLines DMS](#).

Get the Zip File

Download the section zip file to your computer, the files can be obtained from the [PageLines Store](#).

Standard Installation

- Login to your WordPress Administrator.
- Navigate to Plugins.
- Click Add New.
- Locate and click in the Upload link
- Click in the Choose File button.
- Browse your computer and locate the zip file.
- Click Install Now.
- When the installation finishes click the Activate Plugin.

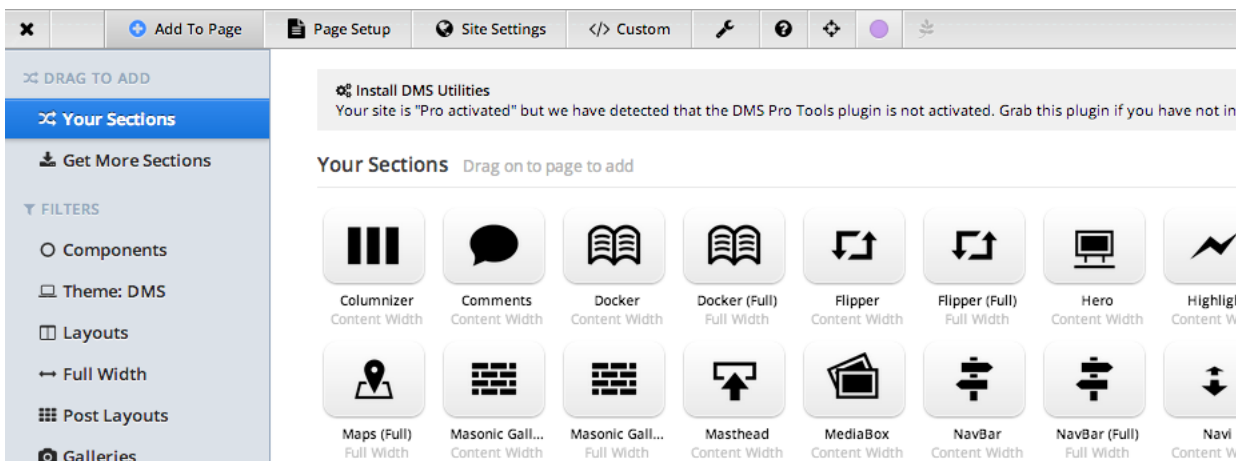

Manual installation

If you encounter problems using the WordPress Installer, you can manually install the plugin using a FTP client.

- To install using a FTP client, you will first need to extract the zip.
- Using a FTP client, access your host web server and navigate to the wp-content/* plugins directory.
- Now upload the new folder to wp-content/plugins
- Your structure should end up like this wp-content/plugins/plugin-name
- When the installation finishes click the Activate Plugin.

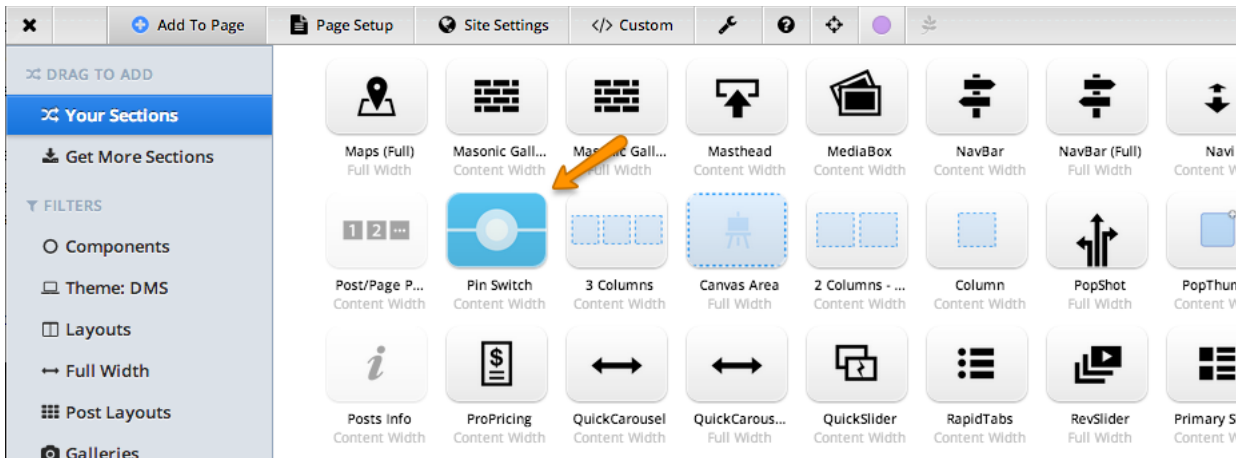

Reload Sections

Once the plugin is active, go to your front-end and locate the "Add to Page" tab and click the "reload sections" button.

Locate the section icon

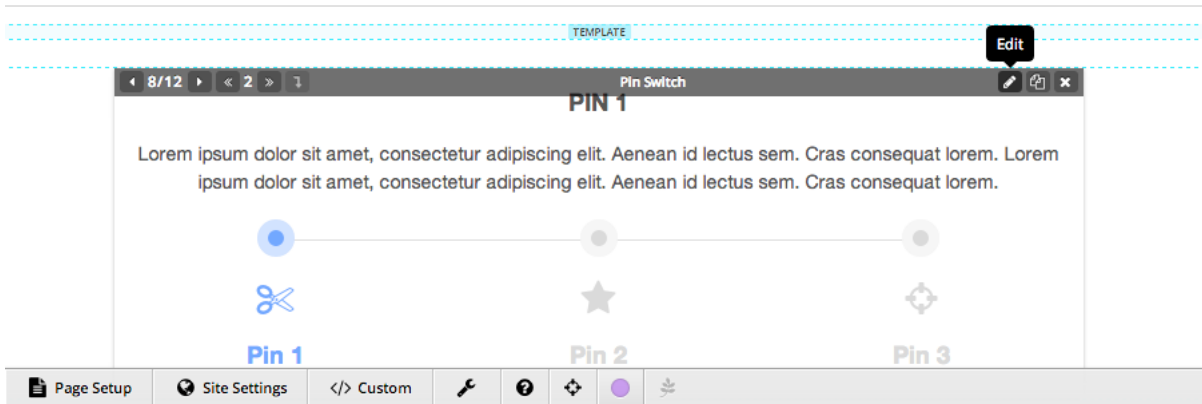

Now you should see the "Pin Switch" section in the grid.

Configuration

As any other PageLines section you need to drag the section to the content page and reload the page.

You will see 3 default pins, click on the "edit" button to access to the section options.

Options

You can configure 7 colors and 4 content settings.
